

4U Rackmount Chassis with 6 Drive Bays, Retaining bar for 14-slot Backplane or ATX Motherboard, Supports PS/2 Size PSU.

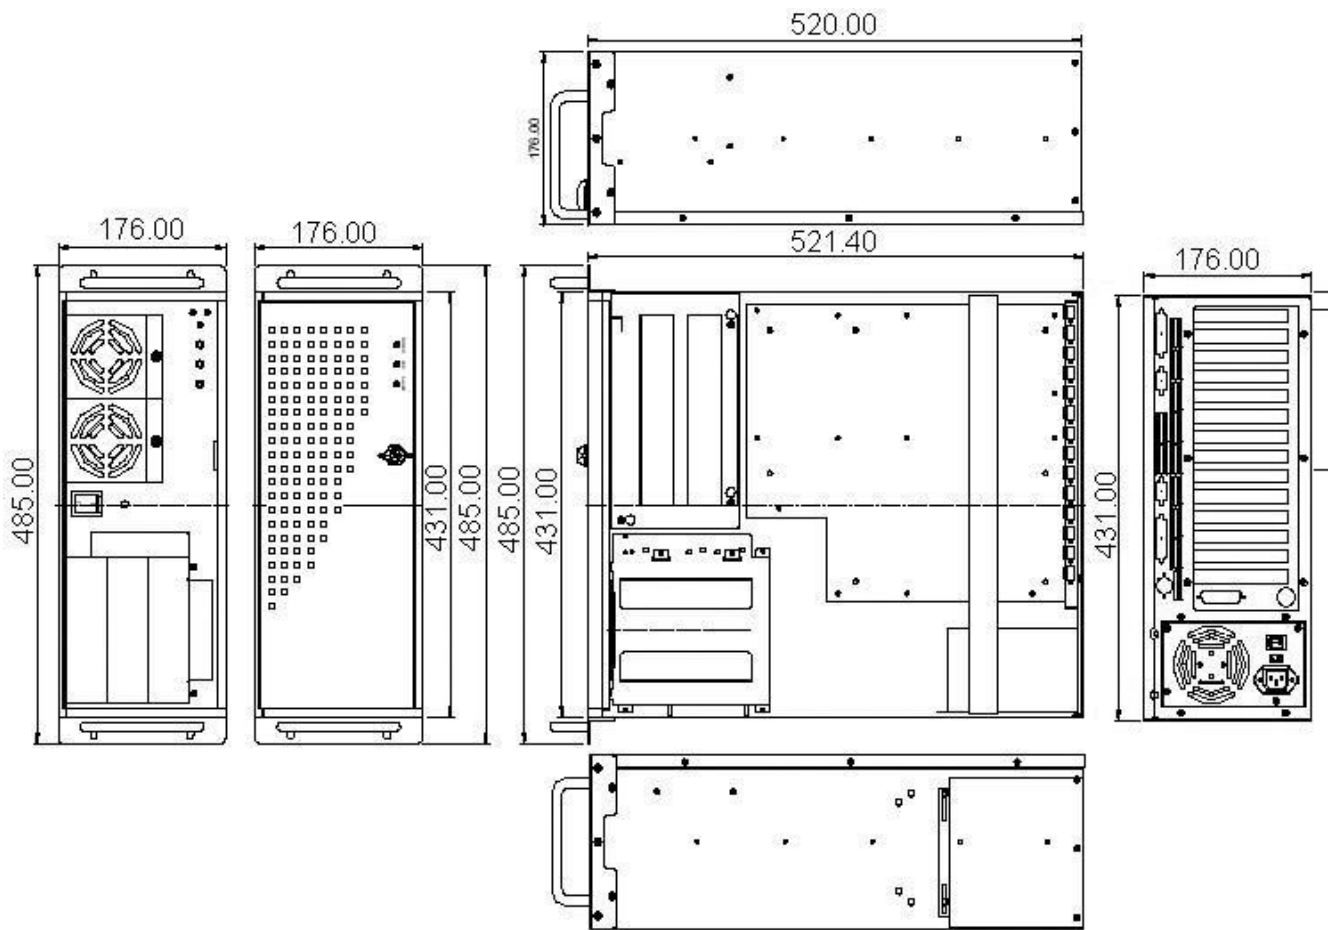

Introduction

The RCK-406 Rackmount Chassis provides solution for a variety of Industrial applications from simple industrial automation to high-end industrial server. RCK-406 is easily configured to support either an ATX Motherboard or a 14-slot PICMG backplane by simply changing the rear panel. The RCK-406 can support up to six shock resistive drives (three 5.25" and three 3.5") and a retaining bar is included to hold expansion cards in place for those applications which encounter a high level of vibration. A fan monitor board equipped with alarm is provided to ensure high-level monitor and control over environmental temperature. The RCK-406 supports PS/2 size power supply, AT/ATX or redundant /non-redundant for any applications with unique power requirements.
